

RIVIERA™ POOL FEATURES

Our steel wall is protected with an exclusive 8-step BonderCoat™ process to ensure the pool is protected from rust & corrosion. This unique coating process makes sure that Riviera pools will last in even the harshest of environments!

The beautiful 8" top rail is made of super-strong resin, helping to ensure that it will never dent, rust or corrode. The top rail is formed as a true round radius, giving the Riviera a more graceful and appealing look and the big 54" wall height allows for even more family fun!

The Riviera is so corrosion resistant that it is one of the few pools that is warrantied for saltwater chlorine generation use.

All fasteners & hardware are made of non-magnetic stainless steel or aluminum to prevent rusting and corrosion.

60 Year Limited Warranty. Lifetime warranty on bottom rails & plates.
